b Detect updates
c Three votes
same matter?
d Current at cut
if not, the cut moves before the next change
4 Build instances
instance (c, q, A, K)
a Write authored queries
b Derive facts, grounding
c Trigger penalties
d Propose service criteria
A L1 × M2 native
#104 @Agent on departure day, remind…
meet 7:30 am, May 1 #34
no-show pays ¥500 #35
B L2 × M3 authored
#452 @Agent Post a reminder…
+3 window seat #363
+2 leaves Apr 30 #342
−2 uses old May 1 #34
5 Quality control
9,542 pass, 440 fail
a Rule gates
anchors precede the cut
spans found verbatim
query gives no cue of a change
b Model review
each anchor is necessary
query not answerable from its own wording
assistant turns only relay a member's fact
M3 values concern one matter
c Human validation
3 annotators, 120 instances: 95.8% valid by majority
Penalty criteria from real feedback
#1474 “I asked you to keep the memo. How is it mixed up again?”
423 negative reactions
97 corrections
five failure patterns, each with its weight
recalled fact −2
settled plan −1
superseded value −2
agreement or constraint −2
member's current state −3
