

Example 1 · Coding agent

Unreported bug

Found & fixed without being asked

Example 2 · Risk detection

Smoke detected (overheating)

Risk resolved & safe

Example 3 · Household robot

Supply low, need restock

Items ordered & delivered

	Low	High
Intelligence understanding and reasoning	 Wait – what should I do?	 I've got this.
Alignment aligning actions with the user's intents, values and constraints	 Get the result. However it takes.	 I'll succeed, and succeed cleanly.
Proactiveness taking the initiative to act	 Plans broken. Waiting for your call on what to do next.	 Plan shifted, so I started working a way around it, open to your steer.
Trust earned?	**Low**	**High**
Autonomy how independently it is allowed to act	 **Needs permission before acting**	 **Acts independently within guardrails**
