trajectory τ
+ deliverable y
Frozen model
M
call
result
delegates
result only
Middleware
hooks every tool call
in tool loop
C8 Plugin
plugin/<name>.ts
enforces a behavior,
rather than instructs it
Tool interface
what the model can call, and how
every call
C4 Tool guidance
tool_guidance.md
guides use
Tools
existing tools, bash
adds a capability
via bash
C7 Scripts
scripts/<name>.py
Orchestration
when work is delegated to a new agent, and how
Subagent
own context window
defines
task tool
C5 Subagents
sub_agents/<n>/AGENT.md
frozen weights
editable file; an edit is a diff
tag
active on every call
tag
on demand
